

PACKAGING TAPES - Printable

I nastri stampabili rientrano in una gamma completa di nastri adesivi da imballaggio dedicati agli stampatori; sono disponibili nelle nuove versioni tecnologiche easy print e nelle tradizionali primer & release.

La gamma comprende nastri a base di gomma naturale in PVC e BOPP con svolgimento rumoroso e non, nastri a base hot melt (rumoroso) e acrilico (silenzioso dopo la stampa) sia nelle versioni standard sia in quelle colorate.

Printable packaging tapes cover a complete range for the printers; they are available in "easy print" (without additives) as well as in the traditional primer & release version.

The range includes natural rubber tapes in PVC and BOPP with noisy and low noise unwind characteristics, in hot melt (noisy) and acrylic (low noise after printing). A full range of coloured tapes is available, besides the standard version of brown, clear and white.
